MENOPAUSE AND OSTEOPOROSIS HELP

Elli MenoOsteo FORTE contains two unique complexes specifically developed for the needs of a woman's body during and after menopause.

Osteo™ - the natural state of the bones due to calcium, vitamin D3 and K2

Calcium is needed to maintain the normal state of the bones and also contributes to correct muscle activity.

Vitamin D₃ helps to preserve the natural state of bones, normal calcium absorption and at the same time also to maintain normal calcium levels.

Vitamin K₂ helps to maintain the normal state of the bone and the natural blood clotting.

Vitamin B₁₂ contributes the normal functioning of the nervous system and the natural formation of red blood cells.

Vitamin B₂ contributes to the natural iron metabolism and the reduction of tiredness and fatigue.

Meno™ - for calm and comfortable passage through the red clover extract

The red clover extract is beneficial for the cardiovascular system, for bone strength while helping to maintain calm and comfortable transition.

The extract of common hop cones contributes to optimal relaxation, a healthy sleep and helps women cope with symptoms associated with menopause, such as hot flashes, sweating, restlessness and irritability.

Nutritional value of the product	in 2 capsules	RI*
