## *Original herbal nasal spray* *Dr. Weiss*

**RymaSTOP® spray** is an original nasal spray based on an original Swiss recipe. It contains a unique combination of 10 standard herbal extracts - **HERBALMEDIC™**:

- eyebright (*Euphrasia Rostkoviana*)
- common violet (*Viola odorata*)
- common mallow (*Malva mauritiana*)
- common horsetail (*Equisetum arvense*)
- small-leaved linden (*Tilia cordata*)
- common marigold (*Calendula officinalis*)
- European elder (*Sambucus nigra*)
- ribwort plantain (*Plantago lanceolata*)
- common yarrow (*Achillea millefolium*)
- blue gum (*Eucalyptus globulus*)

The interaction of these herbal extracts, the hyaluronic acid's activity and the Boswellia serrata wood extract contributes to the rapid penetration of the obstructed nose, to its unblocking, regeneration and moisturising of the nose's mucous membrane.

### **Nosní spray RymaSTOP® Dr. Weiss:**

#### ● **Quick relief from a blocked nose**

Natural herbal ingredients act on the nose's mucous membrane with an astringent, constricting effect, which results in a decrease in secretion and in the improvement of the permeability and reduced nasal congestion. The main source of these effects is the eucalyptus oil and tannins contained in the extract of the sapphire.

#### ● **Unblocks and regenerates the nose's mucous membrane**

The local antioxidant activity of herbal extracts has protective effects on the nose's mucous membrane and stimulates its natural anti-inflammatory and regenerative mechanisms. The antiseptic activity of herbal extracts keeps the nose's mucous membrane clean of microbes.

#### ● **Relieves and moisturises an irritated nose**

The hydration activity of the hyaluronic acid and Boswellia serrata extracts contributes to relieving the irritated nasal mucosa. These natural substances protect, moisturise, soften and soothe the nose's mucous membrane on its surface.

### **Competitive advantages:**

- This medical treatment contains a unique patented combination of more than 10 medicinal herb extracts known for their beneficial effect on the passage of the upper respiratory tract
- Also suitable for long-term use
- Immediate effect + long-lasting action
- Competitive price
